About Us:

Manufacturing Contractors provides product engineering, design, and radical problem solving to fit our customers' needs. With multiple facilities, located in the United States, designing and engineering products and machinery has never been easier.

Capabilities:

- ✓ Product Design and Engineering: In-house engineers, advanced computer programs, and scale modeling allow for proper and accurate structures and products. Cutting edge practices and techniques create excellent quality in our products and in our services.
- ✓ Plastic Manufacturing: Injection molding, rotational molding, blow molding, extrusion, and thermoforming are all available methods of plastic production. UHMW is also an option provided for your high-impact-strength needs.
- ✓ Rubber Manufacturing: Injection molding, compression molding, transfer molding, vacuum molding, extrusion, bonding, and die cutting are a few of the available techniques for rubber manufacturing. We also provide original design, engineering, and testing for all of your needs.
- ✓ Specialized Machine Manufacturing: Design, manufacture, install, and start-up of specialized and custom equipment to meet your requirements and demands. Lathes, mills, and grinders are all examples of our capabilities. Servicing and maintenance plans are available; as well as conversion of your manual machines into full CNC.
- ✓ Project Management: Storage, logistics, and sub-tier supplier organization are effectively and safely handled internally to prevent time loss and increase dependability. IDIQ and JIT contract formats have been successfully fulfilled using our current management systems.
- ✓ Quality Control: We set only the highest standards for quality control procedures, providing ISO9000 certification when applicable
- ✓ Dedicated Transportation: Air-Ride equipped trucks, hot-shot trucking, and a series of railcar designs are available for the fastest and most economical transportation solutions.

Past Experience:

Governmental, Commercial, and Industrial:

- ✓ Department of Energy – Manufacturing of nuclear waste liners.
- ✓ Skolnik Industries – Manufacturing of nuclear waste liner lids.
- ✓ SuperLoads – Design, engineer, and manufacture railroad cargo rigging supplies.
- ✓ Department of Energy – Transportation of delicate testing equipment, fully insured by Lloyds of London.
- ✓ Cargo Risk Management – Scale model assembly for unique cargo shipment preplanning.
